# EView/400i Management Release Notes

## Announcement

The following information is for Version 7.0 of EView/400i Management for Microsoft System Center Operations Manager (EView/400i).

EView/400i allows you to integrate AS/400 or iSeries systems into the System Center Operations Manager (SCOM) environment. As a component of the Microsoft System Center Operations Manager solution, EView/400i extends management of the Microsoft System Center Management environment to OS/400 domains.

EView/400i Management coexists with existing OS/400 management solutions to increase flexibility in managing OS/400 environments. EView/400i monitors the status and health of the OS/400 system and its standard applications.

## Updating from a Previous Release of EView/400i

Please follow the upgrade procedure from *EView400i Installation Guide* Version 7.0.

## Compatibility Information and Installation Requirements

EView400i Version 7.0 is compatible with Microsoft System Center Operations Manager 2012, 2012 SP1, and 2012 R2 general releases.

For detailed installation instructions see the *EView/400i Installation Guide*.

## New features in this version

In this version 7.0 release, the following features are added:

- Automatic closing of any iSeries inquiry message after iSeries operator has replied to it.
- A new monitor for TCP connections status between the iSeries servers and proxy server.
- A new monitor for job with CMTW status - the job is waiting for the completion of save-while-active checkpoint processing in another job.
- A new monitor for job with MTXW status or in mutex wait - a mutex is synchronization function that is used to allow multiple jobs or processes to serialize their access to shared data.
- A new monitor for job with TIMW status - the job is waiting for a time interval to end.
- A new monitor for checking library size (in MB) and object counts.
- A new monitor for checking individual disks for each iSeries for DiskBusy percentage and a number of Input/Output per second against the configurable thresholds.
- Improved EView/400i Configurator and monitoring web interfaces.

## Software Availability in Native Languages

There is no information on non-English languages for EView/400i Management.
