EView/400i Management Version 7.0 Release Notes

Announcement

The following information is for Version 7.0 of EView/400i Management for Microsoft System Center Operations Manager (EView/400i). This version software was released on July 2015.

EView/400i allows you to integrate AS/400 or iSeries systems into the System Center Operations Manager (SCOM) environment. As a component of the Microsoft System Center Operations Manager solution, EView/400i extends management of the Microsoft System Center Management environment to OS/400 domains.

EView/400i Management coexists with existing OS/400 management solutions to increase flexibility in managing OS/400 environments. EView/400i monitors the status and health of the OS/400 system and its standard applications.

Compatibility Information and Installation Requirements

EView400i Version 7.0 is compatible with Microsoft System Center Operations Manager 2012, 2012 SP1, and 2012 R2 general releases and to be installed on Windows Server 64-bit OS.

For detailed installation instructions see the *EView/400i Installation Guide*.

Changes in this release notes

Additions

- Add a new performance rule to collect and display Number of Active Jobs in the Performance folder

Removal

- The following performance rules are removed because they collect incorrect data sources. EViewGroup.AS400.ASP.AvailableSpace, EViewGroup.AS400.ASP.TotalDiskSpace and EViewGroup.AS400.ASP.PctUsed

Changes

- Updated EView/400i agent software for forwarding performance data for the Number of Active Jobs
- Updated EView/400i Message Server Service

Fixes

- Correct the links for five console tasks on the SCOM console
- Correct the unit monitor for system ASP discovery and monitoring
